

What happens when we die?

Go to heaven or hell

Go to a parallel universe

The body dies and the mind continues.

Reincarnation

You are judged by someone

It is impossible to know

You become a ghost

You can / cannot help anyone

Nothing, it's just blank forever

You meet up with your dead relatives

You become one mind with
everyone else who has died

You become any living thing that you want

You get another chance as a human
